

It is brain surgery.

When it comes to your brain or spine, the smart choice is EIRMC.

The best neurosurgeons in the region blend advanced science, skill, and training at Eastern Idaho Regional Medical Center to make sure patients have the best possible results.

Doctors Cach, Greenwald and Marano use sophisticated imaging tools to locate damaged brain tissue faster. And they use our Stealth NeuroNavigator's image-guided surgical capabilities for more precise navigation, meaning smaller incisions, less trauma, shorter surgeries, and faster recoveries.

They are also the only neurosurgeons in the area who perform trauma neurosurgery.

There's a reason EIRMC is the neurological choice.

Dr. Robert L. Cach

Dr. Brent H. Greenwald

Dr. Stephen Marano
